Vision Stainless Steel Seating

ARCHITECTURAL METALWORK • PASSENGER TRANSPORT HANDRAILS • ALLOY STEEL CASTINGS

Gabriel & Company are pleased to present their new range of 'Vision' stainless steel seating.

The design is the result of a thorough investigation into today's requirements for seating in public areas. The need for modular arrangements, with clean uncluttered lines that are strong, safe and almost maintenance free, leads to the natural choice of stainless steel as the ideal material.

DESIGN

Our seat design will complement any new or refurbished building, and is suitable for interior and exterior use. Our expanding product range has been widely specified, particularly where quality is the major factor in the refurbishing of city and town centres, parks, shopping malls, airports, bus and railway stations.

- ◆ Elegant and very distinctive in appearance, being extremely robust and vandal resistant.
- ◆ Our designs have resulted from discussions with local authorities, architects and engineers.
- ◆ Care has been taken to avoid finger traps and sharp edges.

SPECIFICATION

For all seats the basic specification includes sateen polish trims to all metalwork. Additional specification items are:

- ◆ Fixings throughout are stainless steel for maximum corrosion protection unless otherwise requested.
- ◆ Customer's logos can be incorporated on request.
- ◆ All our seating components are in austenetic grade 316 stainless steel.
- ◆ Profile sections are sufficient on all components to ensure durability for public use.
- ◆ The integral construction in a single material also contributes to excellent wear characteristics.
- ◆ Free standing, back to back and wall supported options.
- ◆ Standard pedestal fixing option available.
- ◆ An occasional wipe over with a mild detergent is the only maintenance required to ensure a lifetime of use.

Left: Standard quad seat.
Below: Duo seat
wall mounted option

Gabriel & Company also design and manufacture stainless steel handrails, balustrades and architectural metalwork. At our 40,000 sq. ft. factory in Birmingham we have CAD stations, CNC tube bending, welding, fabrication, machining and polishing facilities.

As part of our commitment to quality, all production complies with BS EN ISO 9002 1994.

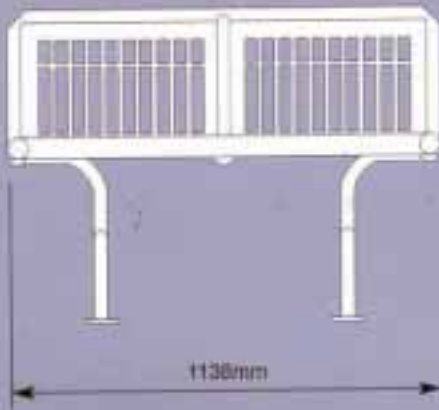

We can also advise on matters concerning access in public areas as well as current building and safety regulations.

For details of any of our products or to request a visit from one of our sales consultants, please contact our sales office at the address overleaf.

Stainless steel planter benches, Milton Keynes

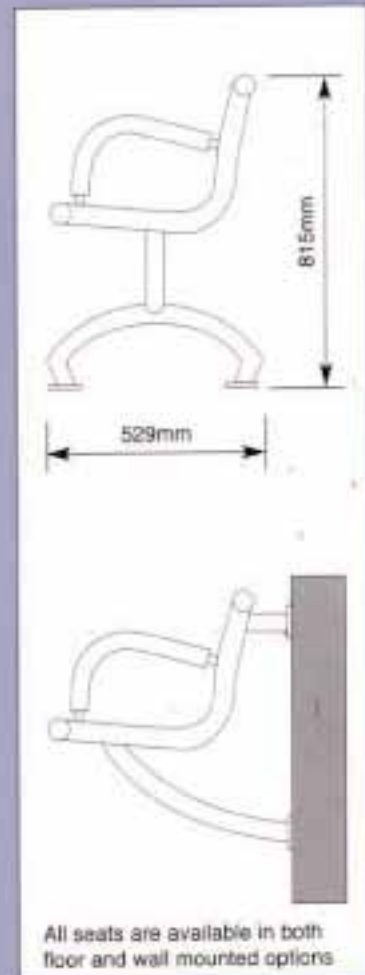

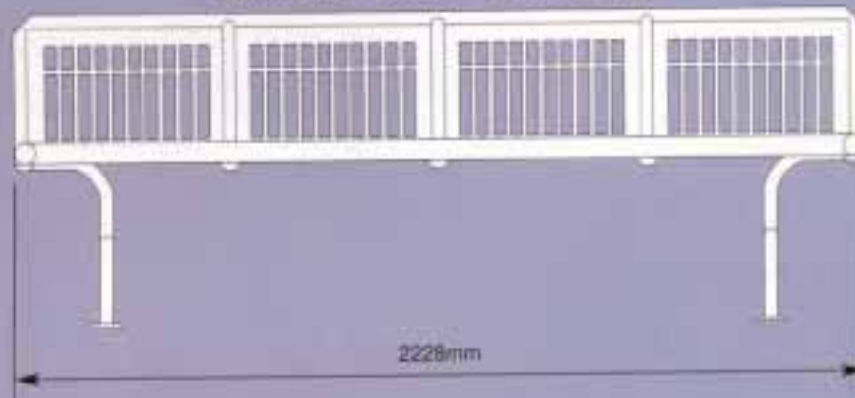

Standard 'Duo' Two Seater

Standard 'Trio' Three Seater

Standard 'Quad' Four Seater

All seats are available in both floor and wall mounted options

As part of our service to you we can offer to install your seats, together with a long term maintenance package where a minimum of ten seats are installed. With this we take responsibility for ensuring that your seats are kept in a sparkling and well maintained condition by carrying out regular safety inspections, and completing maintenance work if required. Please contact us for further details of this service.
